PROJECTS

Z-Kart Ecommerce Website

- * Designed and developed a dynamic and responsive E-commerce Website using the MongoDB, Express.js, React.js, Next.js full stack.
- * Implemented user authentication and authorization features, allowing customers to register, login, and manage their accounts securely.
- * Integrated popular payment gateways (Stripe) to facilitate secure online transactions.
- * It administration panel to manage products, inventory, and customer orders.

Mart Villa -Frontend

- * Built responsive buying and selling website frontend using React and Tailwind CSS
- * Crafted a sleek buying and selling platform's frontend using React and Tailwind CSS
- * Both light mode and dark mode options are provided.
- * Diverse villas are available for both rental and purchase options.

Movies Overview

- * The "MoviesOverview" project is a web application built using HTML, CSS, and JavaScript, integrated with the TMDb API
- * It allows users to search for movies, displays a list of matching movies, and provides detailed information about selected movies
- * This project combines front-end development skills with API integration to create an interactive movie database browser.
